

**Critical Product Availability Update – October 21, 2020**

McKesson Medical-Surgical continues to receive new supply of certain high demand products including personal protective equipment (PPE), hand sanitizer and more. We are now able to offer select products without allocation – **while supplies last**.

**Shop Available Products**

In general, these products fall into three inventory categories (*note these assessments are based on current conditions and subject to change*):

- **Readily Available:** This product is available in our network; inventory may not be available in your distribution center but is available to order.
- **Limited Availability:** Product is in stock and inventory will be replenished, however it is limited in the network. Backorders will be taken and filled once inventory arrives in the coming days or weeks.
- **Close Out Items:** The remaining inventory is all that is available, backorders will not be accepted and the item will be discontinued once it is sold out.

The below information is current as of the date above but subject to change. **View current products** online at: <https://mms.mckesson.com/content/shop-products/ppe-hand-sanitizers/>. Please refer to the product listings on McKesson SupplyManager<sup>SM</sup> for detailed product information, current inventory and product alternatives.

**Readily Available: Products below are available for order.**

**Important Information:**

The U.S. Food and Drug Administration (FDA) has provided updated [Emergency Use Authorization \(EUA\) guidelines](#) for medical products during Coronavirus. EUA products will be notated on McKesson SupplyManager<sup>SM</sup>.

All hand sanitizer products offered meet the Center for Disease Control (CDC) recommendation of alcohol-based hand sanitizer at 60% ethanol or 70% isopropyl to kill COVID. The FDA does not allow for antiviral claims, as per the 1994 Tentative Final Monograph, which all manufacturers must follow. See our [infection prevention resources](#) for more information.
