BIOFIRE® SPOTFIRE® SYSTEM

FDA CLEARED | CLIA WAIVED

PIONEERING DIAGNOSTICS

FASTER. SMALLER. SMARTER.

BIOFIRE® SPOTFIRE® SYSTEM

Many illnesses present with similar signs and symptoms. The innovative SPOTFIRE System is designed to run the revolutionary BIOFIRE® SPOTFIRE® Respiratory Panels. This CLIA-waived solution is built on proven BIOFIRE molecular PCR technology that provides clinicians with syndromic results in a clinically relevant timeframe.

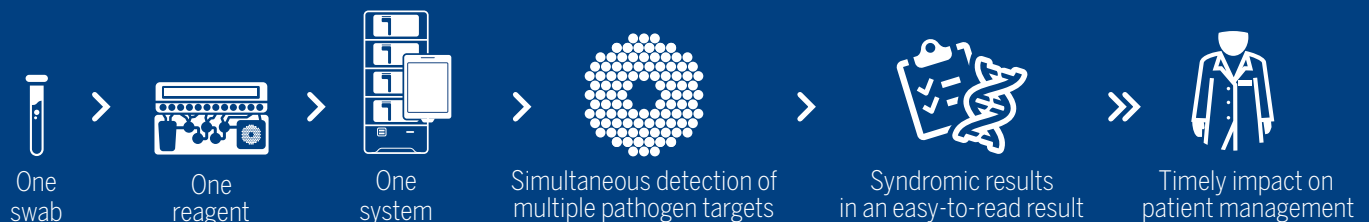

- ✓ In-house lab-grade PCR results
- ✓ Results during patient visit
- ✓ Multiple targets tested with one swab
- ✓ Easy to use with a streamlined workflow

EXPERIENCE THE BENEFITS OF SYNDROMIC TESTING

With integrated sample preparation, amplification, and analysis, the SPOTFIRE Solution uses a syndromic PCR approach, which is defined as a symptom-driven grouping of probable pathogens into one rapid test.

BIOFIRE's syndromic testing detects multiple pathogen targets quickly and accurately, which may reduce diagnostic guesswork, improve patient care, and contribute to overall patient satisfaction.

BIOFIRE SPOTFIRE SYSTEM IMPACT

RAPID ANSWERS

Receive fast syndromic answers in about 15 minutes.

SMALL FOOTPRINT

Requires minimal benchtop space with a footprint just slightly larger than a sheet of paper.

INTUITIVE SYSTEM INTERFACE

Designed to be run by any healthcare professional, in any setting.

SEAMLESS CONNECTIVITY

The system can easily connect with Electronic Health Records (EHR) and other compatible systems and software.

ADVANCED USER MANAGEMENT

Administrators can set up new operators, system competency trainings, and enable initial lot lockout, among other features.

QUALITY CONTROL (QC) MODE

Enables a simplified QC workflow. The lockout feature prevents use of a pouch until it has passed a QC run.

STATE-OF-THE-ART CYBERSECURITY

Ensures confidentiality, integrity, and availability of data.

MINIMAL MAINTENANCE

No general maintenance is needed other than periodic cleaning.

SCALABLE TO YOUR NEEDS

The modular and scalable SPOTFIRE System meets the unique respiratory testing needs of any size clinic. The system is capable of running up to 4 tests at the same time.

¹ Calculation based on running the BIOFIRE® SPOTFIRE® Respiratory Panels (~15 minutes) in an 8-hour shift
