

FASTER. SMALLER. SMARTER.

BIOFIRE® SPOTFIRE® SYSTEM

Many illnesses present with similar signs and symptoms. The innovative SPOTFIRE System is designed to run the revolutionary BIOFIRE® SPOTFIRE® Respiratory Panels. This CLIA-waived solution is built on proven BIOFIRE molecular PCR technology that provides clinicians with syndromic results in a clinically relevant timeframe.

- ✓ In-house lab-grade PCR results
- ✓ Results during patient visit
- ✓ Multiple targets tested with one swab
- ✓ Easy to use with a streamlined workflow

EXPERIENCE THE BENEFITS OF SYNDROMIC TESTING

With integrated sample preparation, amplification, and analysis, the SPOTFIRE Solution uses a syndromic PCR approach, which is defined as a symptom-driven grouping of probable pathogens into one rapid test.

BIOFIRE's syndromic testing detects multiple pathogen targets quickly and accurately, which may reduce diagnostic guesswork, improve patient care, and contribute to overall patient satisfaction.
